

# Computer Scientist (m/f)

Full-Time Permanent Employment at the Earliest  
in Freigericht, Berlin or Bratislava

## Your responsibilities

With the Topic Analyst and CORPUS product family, CID provides an ecosystem for Competitive Intelligence, Knowledge Management, Enterprise Search, Technology Monitoring as well as Patent Analysis. To support our products we provide continuous research in the fields of Natural Language Processing, Information Retrieval, Knowledge Management, Content Extraction, Information Presentation and Big Data Analysis.

Your responsibilities include the development of algorithms for the analysis of structured and unstructured data. Especially the combination of conventional data mining methods and existing NLP-algorithms represent an essential component of your work. You implement the prototypes of the drafted algorithms and transfer them to the excellently qualified development team.

## Your profile

You are University graduate in computer science (a doctor's degree is also welcome) as far as possible with focus on data analysis, neuro-informatics or artificial intelligence. You possess excellent knowledge in machine learning, especially in the fields of classification and clustering. This characterizes you as well as good knowledge in the area of text mining and experiences in programming of C#, Java or Python. Your readiness of mind as well as your analytical approach to different problems are reflected in your operations and you convince because of your distinctive ability to work in a team. Good spoken and written German and English complete your profile.

## Company

The CID GmbH is a part of a fast growing and innovative group with the focus on emerging markets in the areas of business process optimization and information management. Currently our 200 employees from different countries are servicing a number of well-known customers in mail order, telecommunication, automobile and insurance industries. Together with partners in science and research CID uses latest knowledge for developing new ways for increasingly challenging information management, search and categorization. Through its continuously growing international network CID group is strengthening its future competitiveness and secures its market position.

## Your opportunities @CID ...

... are diverse! Do You want to make a difference? CID offers you this opportunity in our economically stable and growing company group. Besides daily tasks and responsibilities you also get great challenges and possibility to actively shape the future, introduce new ideas and participate in their realization.

You will be part of a flexible, highly motivated and young team. Openness and friendliness as well as a very pleasant and modern working environment will enable an easy start with us. At CID we develop groundbreaking products for the top players in various industries. Here you will find direct communication and quick decisions. The assignment of tasks in projects and the collaboration with worldwide leading technology partners offer best conditions for your further professional development that we would like to support. As we are interested in a long-term cooperation we are seeking to sign full-time permanent contract after a successful trial period.
